CO2 multi-sensor

Reference number	
CO2A2178XX	
KNX CO2 multi-sensor	
with integrated BCU with humidity sensor and room temperature controller with integrated push-button interface 2-gang	
Intended use	
<ul style="list-style-type: none"> - Measurement of CO2 concentration, relative air humidity and air temperature - Output of the measured values as telegram to the bus, e.g. for controlling fans or window drives via KNX telegrams - Single-room temperature control in KNX installations - Installation in appliance box according to DIN 49073 	
Product characteristics	
<ul style="list-style-type: none"> - Limit value monitoring for CO2 concentration (max. 4 threshold values) and air humidity (max. 2 threshold values) - Dew point alarm e.g. for cooling blankets and conservatories, to avoid mould formation - Two binary inputs for connection of floating contacts e.g. buttons, switches, window contacts - Logic gates for simple gating functions
